

ENVIRONMENTAL POLICY

Struktura Engineering write this policy in recognition of the increasing demand that products and services are environmentally sustainable, and calls for steps to prevent pollution and protect the environment in an endeavour to rebuild a healthy global environment.

- Ensure continuous improvement of our management systems by setting ourselves robust objectives and targets which will be monitored and reviewed throughout the year to gain continual improvement.
- Wherever practical, use materials and products originating from sources which can be shown to be sustainable and which are re-usable or can be recycled.
- Pay particular attention, to the emission of pollutants and to taking the most stringent precautions to avoid health hazards and ensuring that environmental impacts are minimised during its activities.
- Continue to develop an environmentally aware approach to the management of the Company, recognising also that sound management of energy and resources in land and materials (including life cycle) cuts cost and create competitive advantages.
- Continue to develop and practice in house environmentally caring policies covering its use of premises and other assets. The Company will also continue to promote energy efficiency and sound environmentally sensitive practices.
- Use traditional methods and continually seek innovative and pro-active ways in which to recycle our waste. Review this policy at least annually.
- Fulfil our compliance obligations.
